Eric Electronics Incorporated

An industry leader in passive, electro-mechanical component distribution

As the electronics industry matured and competition from global markets emerged, Eric Electronics was one of the first to pioneer Materials Management programs specifically tailored to the needs of its customers. Today, Eric Electronics continues its tradition of providing leading edge technology, flexibility, quick-turn responsiveness, and top-level quality service to its customers.

The Eric Electronics linecard is comprised of world class component manufacturers utilizing industry leading technology. These solid distribution partnerships are the cornerstones of our product offerings. Only those manufacturers who share Eric's commitment to excellence are represented. It is this salient philosophy which drives the advancement and selection of Eric Electronics' family of products.

Eric Electronics can meet your real-time requirements with "customerized" real-time solutions. Our team of skilled professionals, backed by decades of experience, is able to respond to your needs of today, but also anticipates your needs for tomorrow.

Each of our employees benefits from Eric's Total Quality Management (TQM) program. A fundamental process at Eric Electronics since our inception, TQM ensures ongoing training and evaluation. The result is a team empowered by continuous improvement and backed by strong leadership.
